Portfolio Checkpoint - Content Gathering Details

Objective

Gather all of the content for a website about any topic of your choice (a personal portfolio, a site for a student group, a business, etc.) Your content should take into account DEI, as well as proper coding practices. You need to create four distinct pages of content and also have at least one image on each page, and a minimum of nine images on two of the pages. You will also need an image file (of type .png) to use as your browser tab icon, e.g. the red circle on the tab of Canvas pages.

Requirements

1. Choose your topic.

   Can't think of an idea? Choose something from this list of Sample Project Ideas.

2. Curate your content.

   Before you begin, make sure to review 5 quick changes to kickstart your inclusive marketing in 2021 paying particular attention to points 1-3. Each page needs at least two paragraphs of content **_and_** the image requirements below. (Paragraphs can be replaced with different types of text for the gallery pages if you would prefer to add shorter segments of text to each image.)

3. Organize your content:
   a. Four html files
      i. You need at least four html files and one must be named **index.html**
      ii. The only tags you **need** to have are working image tags, but feel free to use HW1 as a starting point.

   b. A css folder
   i. This should hold the **html5reset.css** file

   c. An images folder
      i. This should hold 20+ images -- a minimum of one image on two of the pages, nine distinct images for the other two of the pages, and

an image for the favicon for all of the pages. Make sure to use the resources mentioned in Step 2 above.

4. Double check the format of your materials
    a. None of the file names have spaces and none of the non-image files have uppercase letters in the files names either.

    b. The html files should just contain the textual content you want on your page, with the exception of images

    c. Each image tag should have a default width of 200px

5. Upload your files to your Github account
    a. Create a repo name portfolio-content and upload all of your files.
    b. Change the settings to include a main branch in Page

Submission

Notes

Submission

Notes

- If you do not receive full credit you may resubmit one additional time as long as it is within 10 days of the grade release.
- Make sure to read the instructor comments very carefully after the grades are released.
